### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: The closest prior art of record, JP2002-20806, teaches away of from applicant's atomization process of oxides formed on the powder surfaces, wherein iron oxide is able to efficiently decompose organic halides. JP '806 states that the reactivity of the cleaning reaction lowers when oxides are formed on powder surfaces (see paragraph 24). Accordingly, the claims are allowable over the art of record.
